Our mission is to educate, support and provide for those in our medical, health and fitness fields who are under- or uninsured or otherwise experience barriers to receiving comprehensive healthcare.

We strive to improve the health of our community by improving the health literacy of our community members, focusing on those in the health and fitness fields.

Through community health education classes, workshops and medical services, we strive to improve the health of our community, one member at a time.

We seek to expand health education and services also to those traditionally under-served by the customary medical model, including: low-income, students, seniors, active military, veterans, those on SSI and/or experiencing significant chronic medical conditions.

All of us at Santiam Community Health are very happy to serve you!
